

Demoralization is Inevitable in the Case of Legalization of Homosexuality.

The ANNOUNCEMENT of the RA Public Council Subcommittee of Religion on the draft Law “On Anti-Discrimination” elaborated by the RA Human Rights Defender Institution.

With this announcement the members of the Subcommittee of Religion expresses their deep concern in regards to the draft law “On Anti-Discrimination” elaborated by the RA Human Rights Defender Institution. Unfortunately, today it is undeniable, that the mentioned draft law set basis for the legalization of amorality and perversion in the Republic of Armenia. In the case of its adoption, the above-stated draft law will evidently legalize the rooting of sexual minorities and the propaganda of their life style.

We state and warn, that not only the family institute and other components of the Christian system of values are endangered, but also the future of our children and our country. In regards to this, the passive position of RA state officials, politicians, as well as parliamentary powers on the processed aimed at legalization of perversion is unclear to us. It is invidious, that RA official representatives, when signing a number of international obligations, in fact lured the Armenian society into a trap of propagation of homosexuality.

As a part of an advisory body adjunct to the RA President Staff, the Subcommittee of Religion calls that during the adverse conditions of economic issues, migration, political and governing crises, our country is facing a new threat: final demoralization, which is inevitable in case of legalization of homosexuality. Such an attack could be fatal for our country. Hence, we call for the national unification against this obligatory propaganda of amorality and perversion and for the unyielding struggle for the future of our children, our future generations and our country.

RA Public Council Subcommittee of Religion.
